R	return keyword, lambda expression 390
1)	return types 75
race conditions 630, 650	ignoring value of 78
random() 111	overloaded methods 193
Random class 111	polymorphic 189–190, 192
	return values, autoboxing with 292
random number generators 19, 111	reverse domain package names 685
Reader 594	RMI (Remote Method Invocation) 553
Read Eval Print Loop. See REPL	run() 612, 613
Ready-Bake Code	Runnable interface 612–617
GameHelper class 152–153	runnable thread state 616
simple Chat server 606	
Songs class 398–399	RuntimeExceptions 430
records 699–700	runtime versus checked exceptions 430
reference variables 49	Ryan and Monica concurrency scenario 641–643, 646,
accessing in arrays 83	655–656
in arrays 61–62	Q
assignment 264	Ø
avoiding dot operator exposure of 80	SAM (Single Abstract Method) 341, 389, 394
calling methods by 215	
casting 218	scope, variable 260–267
comparing 86	scrolling (JScrollPane) 524, 527
equality 348 garbage-collection heap 57–58	security
HeadFirst interview 56	and final classes 191
on heap 240	from package organization in Java library 156
life and scope of 260–267	semicolon (;) 12
memory space allotted for 241	Sequence 446–447
nulling 265	Sequencer class 424–427, 444, 446–447
null reference 58	Serializable interface 547–550
and objects of type Object 213-215, 217	
polymorphism 187–188	serialization 540, 541–550
size of 56–57	game characters example 554–555
regions, BorderLayout 514–517	process 544–546 versioning 556–557 writing object to file with stream 542–543
remote interface. See RMI	
repainting objects, GUI 492-495	serialVersionUID 557
replaceAll 694	server application, networking 601–603
REPL (Read Eval Print Loop) 684	server-client relationship 589–593
reserved words 53, 328	server, socket 601

the index

ServerSocketChannel 601–602	stack 238–241
Set interface 345, 349	calling methods from 239 superclass constructor 254–256
setLayout(null) 522	
setLocationCells() 102	threads 610–614 variable declarations 238
Set.of() 357	stack frame 239
setter methods 80–82	stack variables. See local variables
Setters. See Getters and Setters	StartupBust class 141–148
short circuit operators (&& ,) 151	Startup class 138–139, 141, 150
ShortMessage instance 450	Startup objects 143
ShortMessage.setMessage() 450, 498	statements 12
short primitive type 51, 53	state of an object. <i>See</i> instance variables
shutdown() 629	static final variables 275, 284, 696
Simple Startup Game 98–124	static helper method 408
SimpleStartupGame class 108–111, 126–130	static imports 303
SimpleStartupTestDrive class 103–106	static initializer 284
Single Abstract Method. See SAM	static methods 396
Sink a Startup game 96–97, 140–153	event handling 498–499
skip(), Stream 375	and object locking 649
sleep() 622–624	and wrappers 294
Socket 596–602	static variables
SocketAddress 594, 595	initializing 283
SocketChannel 591, 594, 595, 601–602	versus instance variables 304–305 and non-static methods 286 and serialization 553
Song class 316	
Song object 316–319	stream pipeline
sort() 318–319, 325–330	creating 379–381
sorted() 375, 381, 390	map operation 405–407
sorting	streams (I/O)
Comparable interface 325–329	reading text files 566 receiving messages 594
with Comparator 331–338	in serialization of object 542–543
List 311–313	socket connections 596
TreeSet 352–354	streams (Streams API) 369, 373, 375–420
source, event 466	building blocks 379–381
source files, structure of 7	collecting results 409–410
spillage, variable values 52	filtering 400–403
split() 570	getting results from 378 inability to reuse 384

lambda expressions 388–397	GUI for Beatbox 528–533
parallel streams 695	layout managers 511–522
stream() 376, 384	switch statement 697–698
String arrays 19	synchronization for concurrency in accessing objects
StringBuilder 688	646–654
String class 191	synchronized block or methods, threads 647–649
String.format() method 296	synchronized keyword 646–649
Strings 62	syntax 12, 14
immutability 688	System.out.print() 15
percent sign (%) in 297–300	System.out.println() 15
reusing 688	
saving data to text file 559–571	
sorting in mock Songs class 311–313 split() 570	TDD /T . D . D
wrapping and unwrapping 294–295	TDD (Test-Driven Development) 101–103
subclasses 31, 168–194	temporarily not-runnable, thread as 617–619
conditions for making 229	terminal operations 377
depth of, best practices 191	collection query options 410–412
as extensions of superclass 179–183	as eager 382–383
as instantiators under abstract classes 203	stacking 380
limitations on 191	in stream operations 379
method implementation designs for 174, 175	test code 99, 145
and polymorphism 190	Test-Driven Development. See TDD
relationship to superclass 182	tester class 36
and superclass constructors 256	testing code, annotations in 692
super() 256, 258	text area (JTextArea) 524–525
superclass 31, 168–194	,
contract rules 192	text field (JTextField) 523
in exception declaration and catch 436-437	text file
Graphics 474	reading from 566–571
invoking superclass version of method 230	saving data to 540
and multiple inheritance 224–225	writing data to 541, 559–564
and no reverse inheritance 182-186	this() 258
overriding methods from 192	Thread class 609-610
reference type as 188	Thread constructor 614
relationship to subclasses 179, 184	thread of execution 609-610
superclass constructor 252–259	thread pools 626–629
super keyword 182	•
Swing 462, 464, 509–532	threads. See multithreading
components 510, 523–527	thread-safe data structure 664–666

the index

thread scheduler 617–619	varargs (variable argument lists) 302, 691
throw clause, exceptions 426, 429-432, 436	variables
toString() 316	in arrays 59–62
Track 446	assigning values to 52
transient keyword 550	comparing types 86
transient variables 549, 553	concrete type with var 698 declaring 54, 84, 85, 116, 144
TreeSet 352–354	descriptive naming best practice 698 final 275, 284–286 of generic types 321 instance. See instance variables local. See local variables naming 50–52, 61 primitive. See primitive variables reference. See reference variables static. See static variables syntax 12 types 41 var for local 698 version ID, serialization 556–557 vertical scrollbar 527 virtual method invocation 177
try/catch blocks 427–430 catching multiple exceptions 435, 438 exception handling role 443 flow control 432–433 order of multiple 437–440 as polymorphic 436–440 wrapping call in 444 TWR (try-with-resources) statement 576–577 type inference 312, 698 type modifiers, number formats 301 type parameters ArrayList 323 generic methods 324, 362 not defined in class declaration 324	
String in angle brackets as 137	W
types for lambda expression 394 parameters and methods 78 variables 50	while loops 13, 115, 566 widgets 471 drawing 2D graphics 471 images on 473
${f U}$	images on 473 wrapper constructor 290
underscores for large numbers, formatting 296 unwrapping a value 290	wrappers immutability 688 Optional as 410–414 for primitive types 290–294
values, variable	writeObject() 543
object reference as 55 passing when calling a method 74 static variables 283	Writer 595

wrapping and unwrapping 290
